PROFILE SUMMARY

Experienced and results-driven Web Developer with a proven track record in creating and deploying high-quality web applications. I am seeking a challenging role where I can apply my skills in front-end and back-end development, problem-solving, and delivering impactful digital solutions to achieve business objectives.

WORK EXPERIENCE

Clean YouTube
A Simplified Version Of YouTube

- When a user watches a video on YouTube, the platform suggests additional videos. Often, users end up wasting valuable time watching irrelevant content.

- Clean YouTube is designed for users who want to save time by avoiding irrelevant video recommendations. This platform does not provide video suggestions, allowing users to focus only on what they choose to watch. Users can also search for videos, playlists, and channels directly on the site.

Track Day
Securely and Confidentially Track Time

- Time tracking boosts productivity by revealing how time is spent, highlighting inefficiencies, and helping prioritize tasks. It enables better decision-making and improves overall performance.

- Track Day is a web application designed for time management. As a Progressive Web App (PWA), users can install it on their phones, and it works offline. All data is securely stored in the browser's local storage.
